

1. Netbeans Project URL: `http://localhost/folderName/`
Index File: `startScreen.html`

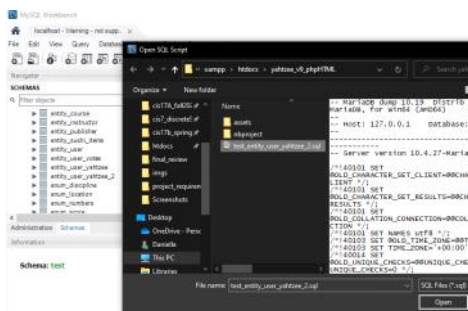

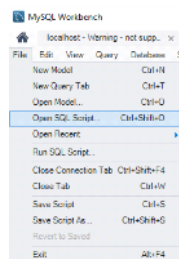

2. Open XAMPP and start Apache and MySQL.

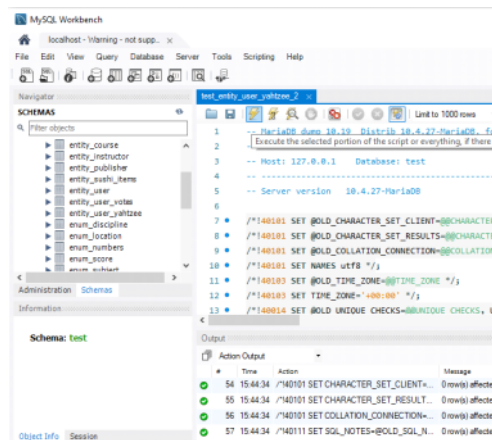

3. Open MySQL. Make sure there's a localhost connection already established. If no connection, then see folder: connect_mySQL_openOffice_imgs.

- a. Select "Open Script" and within our project folder select: test_entity_user_yahtzee_2_-_Copy.sql.

- b. Add SQL table into test database by clicking the lightning bolt symbol.

4. Open the Open Office app. Within our project folder, select file “user_yahtzee_3.obd”.
 - a. Select “Query” and double click “user_yahtzee_2”.
